Dexil Str.—Will you please print the qualifications of voters in your next issue. It seems remarkable that from a roll of 300 electors only about 100 should vote, (as at last election). Possibly the partial reacon may be, that citizens of the United States think they haven o vote. Now as this is a wong impression and we have many excellent and public spirited men from there by all means, ungethern to vote, it will not interfere with their loyalty and they are just as much interested as mative born residents in having the beat men elected to office. If such men are elected to office, if their men are elected to office, and will deserve and receive the support of all in their ouleavors to forwart the public good.
